

Artist Statement 2022...Sheryl Zacharia

My art is a reflection of my interaction with the visual world, and the deep emotional connection I have to it.

The sculptures are inspired by my love and deference for nature and my intuitive connection to past cultures.

My current work straddles a conversation between geometry and fluidity. This tension is driving my compositions as well as the interaction between positive and negative spaces and the color palette to bring overall unity.

The abstract shapes and painted surfaces are influenced by my music and painting backgrounds. Pattern and form are rhythm, palette is harmony, lines and shapes are lyrical. Creating brings me great joy and is a language for me to express myself. When I see beauty in life or art I want to repeat it in a unique and meaningful way. I'm striving to make visual poetry.
